INVENT A PRODUCT

SWIVEL BENCH WITH ROOF

We invented a revolving bench, the best solution for the rain. It is a bench that when it rains, rotates the seating area and pops out a roof so you don't get wet when you sit down!

We invented it because if you are outside and want to sit with your friends or family, and you can't because all the benches are wet you can sit on ours.

This is a product that turns into a rotating street bench with a roof. It rotates so that even when it is raining constantly, it won't get wet.

It is better than other benches because you can sit on them when it rains without getting wet. It has an ergonomic and aesthetic design that modernizes the streets.

The benches are made of aluminum and are gray in color. They also have a black button on the bottom that allows you to turn them over.

The benches are made for all types of people, except for people with reduced mobility who have wheelchairs.

It is a very useful invention for rainy days if you want to spend time with your family on the street and can't because of the rain.

PROS AND CONS

PROS

You don't get when it's raining or has rained

Is people need to rest that can do so without getting wet

aesthetically it is beautiful

Anyone who wants to can use it, except people in wheel chairs

CONS

IS it rains and is windy it can generate water inside where people are sheltering

There can't be many people sitting there because the seat aren't very wide.

people with disabilities who have wheel chairs will not be able to use it
